## ■ Introduction to HTML

### What is HTML?

`BOLDBLOCK0` stands for `BOLDBLOCK1`.

It is the `BOLDBLOCK0` used to create and structure content on the `BOLDBLOCK1`.

---

### ■ What Does HTML Do?

HTML is used to:

- `BOLDBLOCK0` on a web page (like text, images, videos, links, etc.)
- Define `BOLDBLOCK0`, `BOLDBLOCK1`, `BOLDBLOCK2`, `BOLDBLOCK3`, `BOLDBLOCK4`, and more
- Embed other technologies like `BOLDBLOCK0` (for styling) and `BOLDBLOCK1` (for interactivity)

---

### ■ Basic Structure of an HTML Document

```
My First Web Page Hello, World! This is my first HTML page.
```

#### ***Explanation:***

- `<!DOCTYPE html>`: Tells the browser you're using HTML5
- `<html>`: Root element of the HTML page

- `<head>`: Contains meta info like title, links, etc.
- `<body>`: Holds everything that shows on the webpage (text, images, buttons, etc.)

---

## ■ Common HTML Tags

Tag	Purpose
<code>&lt;h1&gt;</code>	Headings (h1 = biggest, h6 = smallest)
<code>&lt;p&gt;</code>	Paragraph
<code>&lt;a&gt;</code>	Hyperlink
<code>&lt;img&gt;</code>	Image
<code>&lt;ul&gt;</code>	Unordered/Ordered List
<code>&lt;li&gt;</code>	List Item
<code>&lt;div&gt;</code>	Container/Division
<code>&lt;span&gt;</code>	Inline container
<code>&lt;input&gt;</code>	Form elements for user input

-----|-----|

`<h1>` | Headings (h1 = biggest, h6 = smallest) |

`<p>` | Paragraph |

`<a>` | Hyperlink |

`<img>` | Image |

`<ul>` | Unordered/Ordered List |

`<li>` | List Item |

`<div>` | Container/Division |

`<span>` | Inline container |

`<input>` | Form elements for user input |

---

## ■ Why Learn HTML?

- It's the **BLOCK** of all websites.
- Works with **BLOCK** (for design) and **BLOCK** (for logic).
- Super easy to start, even for complete beginners.

---

Would you like to try writing some HTML or build a small webpage together?
